Work History

Oct. 2021—

Current

Sr. Full Stack Developer

 **Recharge** Charlotte, NC (Remote)

- Design, code & host scalable internal & external tools
- Designed & architected company's first public ETL tool to improve customer migration experience and time
- Created internal site that drastically decreased merchant data migration duration & complexity
 - Up to a **45x** speed improvement compared to previous tools
 - Tech: Flask, React, Redis, PostgreSQL, Docker, GCP
- Manage & optimize relevant GCP cloud infrastructure including serverless apps, VPSs, SQL & Redis
- Write migration scripts to assist with complex data migrations & remediation projects for largest merchants on platform

Jun. 2022—

Feb. 2024

Sr. Frontend Engineer - React

 **Mythic Digital** Charlotte, NC (Remote | Contract)

- Create reusable, interactive & accessible React components, responsive at any screen size
- Accurately render designs & user stories into functional components
- Provide feedback & expertise on configuration of frontend tech stack
- Leverage & keep current with ever-changing React + frontend technologies & advancements
- Work in agile team to estimate, split & distribute user stories
- Provide live demos of component functionality to clients

Oct. 2020—

Oct. 2021

Technical Migration Specialist

 **Chargify / Maxio** Deerfield Beach, FL (Remote)

- Ramped quickly on API-driven product to serve as subject matter expert on data migration projects, including analyses of data files, formats & platform validation
- Performed API imports & analyses to reconcile complex data issues & produced detailed output for non-technical stakeholders
- Responsible for importing **>\$15M** merchant ARR in first 12 months with company
- Developed internal website to reduce data formatting times & provide revenue insights
- Learned Ruby, React.js & some Rails to more easily interface with Product / Development teams on product gaps & bugs

Strengths

- > Analysis, problem-solving
- > Rapid development & iteration
- > Technical documentation & communication
- > Quickly assimilate new languages, technologies

Feb. 2016—
Oct. 2020

Tier 2 Technical Support Specialist

 Sage Outsource Solutions Pompano Beach, FL

- Led Tier 2 support team as subject matter expert on many LogMeIn & formerly CitrixOnline products (LogMeIn Pro & Central, Hamachi, GoToMyPC, GoToMeeting, etc.)
- Worked with software development team on reported errors & bugs on newly released software & assisted in deployment of release fixes
- Learned C# to develop GUI application to quickly analyze & understand complex log files
 - Cut required log-analysis training from **months to days**
- Created internal site to facilitate Tier 1 to Tier 2 escalations, provide troubleshooting steps, & assist with preliminary log analysis

Education

Aug. 2015—
Aug. 2019

BA Political Science

Florida Atlantic University - Boca Raton, FL
